

SQL Mini Project – Sales Insights Analysis

**Using SQL to analyze Customers,
Products & Orders data. CRUD +
Joins + Aggregations + Business
Insights**

Dataset Overview

Customers

CustomerID, Name, City,
SignupDate

Products

ProductID, ProductName,
Category, Price

Orders

OrderID, CustomerID, ProductID,
OrderDate, Quantity

Q1) What is the total revenue generated by the store.

Problem

```
SELECT SUM(p.Price * o.Quantity) AS TotalRevenue
FROM Orders o
JOIN Products p ON o.ProductID = p.ProductID;
```

Solutions

	TotalRevenue
▶	141400.00

Q2) Which customer has spent the highest amount.

Problem

```
SELECT c.Name,  
       SUM(p.Price * o.Quantity) AS TotalSpent  
FROM Customers c  
JOIN Orders o ON c.CustomerID = o.CustomerID  
JOIN Products p ON p.ProductID = o.ProductID  
GROUP BY c.Name  
ORDER BY TotalSpent DESC  
LIMIT 1;
```

Solutions

	Name	TotalSpent
▶	Shantanu Dhara	59000.00

Q3) Which product category generated the most revenue.

Problem

```
SELECT p.Category,  
       SUM(p.Price * o.Quantity) AS CategoryRevenue  
FROM Products p  
JOIN Orders o ON o.ProductID = p.ProductID  
GROUP BY p.Category  
ORDER BY CategoryRevenue DESC;
```

Solutions

	Category	CategoryRevenue
▶	Electronics	135000.00
	Fashion	6400.00

Q4) Find the most frequently purchased product.

Problem

```
SELECT p.ProductName,  
       SUM(o.Quantity) AS TotalUnitsSold  
FROM Products p  
JOIN Orders o ON o.ProductID = p.ProductID  
GROUP BY p.ProductName  
ORDER BY TotalUnitsSold DESC  
LIMIT 1;
```

Solutions

	ProductName	TotalUnitsSold
	T-Shirt	3

Q5) Get the month-wise revenue trend.

Problem

```
SELECT DATE_FORMAT(OrderDate, '%Y-%m') AS OrderMonth,  
       SUM(p.Price * o.Quantity) AS MonthlyRevenue  
FROM Orders o  
JOIN Products p ON o.ProductID = p.ProductID  
GROUP BY OrderMonth  
ORDER BY OrderMonth;
```

Solutions

OrderMonth	MonthlyRevenue
2024-03	59000.00
2024-04	25000.00
2024-05	57400.00

🌟 Key Learnings

- ✓ Practiced CRUD + Joins + GROUP BY
- ✓ Extracted real business insights using SQL
- ✓ Improved query structuring and analytics thinking

🔧 Tools Used

- ✓ MySQL • SQL Workbench • Canva (Visualization)
- 🤝 Let's Connect | Thanks For Watching
